**27 - 2021 Jan-Mar Calving Bred Heifers**

**2 - Feature Pregnant Recipients**

Grant & Annette Hirsche Family

We welcome commercial and purebred cattlemen from around the world to our annual production sale. Last year was a good, but very challenging year with the many changes it presented. We sincerely thank those friends, family members, and neighbors that stepped to the plate while we were in the transitional period and during my recovery from my accident in January. MJT and staff can't be thanked enough as they came and took our bulls to Calgary when we weren't able to. Also the Nelsons did all they could during the transition period to help things go as smooth as possible including feeding all bull calves so they could continue to go through the grow safe program and ultrasounding as before. All those that calved our cows are found on our thank you page 4. We do feel blessed to be where we are today with all the changes that have transpired. Thanks again.

After the mature cow sale last fall, we have a young exciting herd with a few of our top donor cows. Last year most of our top cows had our very best heifer calves, so we had an added feature and sold pick of these top 10 cows with heifer calves. These heifers were special and were picked on 9 of the 10 choices, which provided us with 9 of our top cows to continue. We have had an extensive ET program as well, evidenced by the exciting offer of embryos for sale.

This sale offering is as strong as ever, high lighted by our best bred heifer lots. We bred over 100 yearling heifers and decided to sell 27 of the top end. The 2 year old bulls are also exceptionally strong, especially with the added feature of having some of our top customers as consignors. Most of the bulls are our breeding and many were purchased in dame from previous sales. All these bulls have been here over a year, so have the same testing procedures and management as ours with the same satisfaction guarantee.

As always, a special feature is our top show heifer calf and herd sire prospects in the bull calf division.

These groups are exceptionally strong representing our best and newest genetics available. With our transitions, these cattle have not been pampered and are presented in their "working clothes."

We are excited with the opportunity to develop our new "ND" initiative, and the signing of our new Korean contract with Jaesung Park of Banaba Meats BNF. This will give us an excellent opportunity to send these "ND" genetics through the system and be able to track our progress with marbling and carcass traits. These "ND" cattle will qualify for our Korean market. They must be high marbling cattle to qualify.

So once again, we welcome everyone to have lunch, evaluate our offering and join us in this new adventure.

Thanks and see you all Dec. 9

# Introducing Hirsche Hereford's “ND” New Direction Brand

## OUR VISION

New Directional Herefords blending the new with the old

## NEW FOCUS

Concentrating on Carcass, Rib-Eye, Marbling and Yield  
Blending it with Maternal, Performance, calving ease, fertility and feed efficiency

In order to carry the “ND Brand,” each animal must be in the top 30% for BW, WW, YW, Udder Score, Milk and top 20% for Marbling and REA.

With our retail meat marketing background, carcass has always been a high priority at Hirsche Herefords. But now it's even more critical.

Our “ND” Herefords must have carcass, but must also excel in maternal, fertility, calving ease and performance. It is our goal in 5 years to have over 1/2 of our cowherd and 90% of our bulls to be carrying the coveted “ND BRAND” and they must be genetically enhanced.

## NEW KOREAN BEEF ADVENTURE

We are extremely excited to have just finished signing an exclusive contract with the President of Banaba Meats BNF, Mr. Jaesung Park, for up to 15,000 head per year of fat cattle to be exported to South Korea starting immediately. Hereford cattle will qualify only if they have high marbling.

### HIRSCHE FRASER MEATS

Providing “Gold” Quality Meat  
for 18 years.

\* Special thanks to  
Noe Chavez, our Manager.

Grant and Jaesung Park

Korean Delegation at the Ranch.  
Right to Left: Jong Kwan Lee (John)  
President of Banaba Meats AB, Youn  
Su Shin, COO of Banaba Meats BNF,  
Grant Hirsche, and Jaesung Park,  
President of Banaba Meats BNF

Signing the contract.  
Grant and Jaesung

# THANK YOU

## **Hirsche Herefords**

P.O. Box 20, Del Bonita, Alberta T0K 0S0  
[www.HirscheHerefords.com](http://www.HirscheHerefords.com)

### **SALE DAY PHONES:**

Grant Hirsche (403) 652-8254

Annette Hirsche (403) 652-0456

**\*\*All Marketing Agents listed on page 7 will  
be available with phones sale day.**

### **TERMS & CONDITIONS:**

**Guarantee:** Standard Canadian Hereford Association Guarantee  
applies. We do, however, follow up on all animals sold to insure  
satisfaction.

**Health:** The Herd is maintained in a TB and Brucellosis free  
area and the Cowherd is annually vaccinated for IBR, P13,  
BVD, BRSV and Vibrio. All Sale bulls have been treated with  
Ivermectin. All ET Cows are preg checked by DRI and the  
Cows are preg checked by Dr. Ray Roberts.

**Terms:** Cash Sale day unless arrangements have been made with  
Grant and Annette. We will make every effort to accommodate  
your needs. Cattle become the responsibility of the buyer after  
purchase

**Sight Unseen Program:** Call and let us help select the right  
animal for your needs. We guarantee the best possible animal  
for the best possible price. If you aren't satisfied with our  
choice, we take them back.

**Other Information:** All announcements from the Auction  
Stand take precedence over any other information written or  
oral. PHONE AND INTERNET BIDS accepted.

For In Herd Semen Interests in Bulls announced sale day:

**WE ARE RESERVING THE RIGHT TO DRAW SEMEN ON  
ANY OF THE BULLS SOLD IN THE SALE TO BE USED  
IN OUR OWN HERDS ONLY. THIS WOULD BE DONE AT  
OUR EXPENSE AND THE BUYER'S CONVENIENCE.**

### **ALL CANADIAN FEMALES MUST BE PICKED UP BY DECEMBER 20TH.**

**For US Buyers:** At Buyer's request, we will provide all health,  
customs and brokerage papers and delivery of the cattle to US  
SIDE OF SWEETGRASS, MONTANA. Trucking from that  
point will be the buyer's responsibility. Help with arrangements  
for trucking to final destination is available. \*Note if you want  
us to do your paperwork, you must provide your IRS number  
sale day.

**Wintering:** \$200 discount per bull if they are picked up before  
December 15th. Bulls can be wintered free of charge until the  
March Bull Sale if you would like. \$100/month will be charged  
after that date, but must be picked up by April 1st.

**RANCH LOCATION:** Del Bonita, Alberta on the USA/Canada  
border. Highway 501, between Whiskey Gap and Del Bonita,  
Alberta. Turn south at Range Road 230  
Directions from Great Falls Airport: Approx. 2.5 hours. Drive  
north on I-15 and west on Highway 501

**Accommodations:** Cardston South Country Inn (403) 653-8000  
Lethbridge Comfort Inn (403) 320-8874 Shelby, MT Best  
Western Inn (406) 424-4560

**Data and photos will continue to be updated online clear up to sale  
day. Some videos online starting November 13 - Nov 20.**

# THANKS TO OUR MARKETING CREW

Fellow Cattlemen:

It is with a great deal of excitement and optimism that I welcome purebred & commercial cattlemen from around the world to Hirsche's annual production sale. I have had the privilege of working with Grant and Annette for over 45 years and have written 32 welcomes as this marks the 32nd sale I have sold for them. A lot has changed over the last 32 years, but the excitement and enthusiasm the Hirsche's bring to this breed has never changed.

This sale has always been at the forefront for providing as much data as anyone in the industry. They use ultrasound, grow safe, herd trax, EPDs and now DNA testing for EPD accuracy. Carcass has always been a high priority. I remember one of their first sales 30 years ago, ultrasound data was provided and has been ever since. All this has helped create the industry leading herd they're establishing.

This sale represents some of the newest and most exciting genetics they have offered combined with the old proven ones. The embryos are an example of these new genetics that excel on paper, but also in phenotype. Once again an offering of herd bull prospects and yearling bulls as powerful as ever. The female offering is extremely deep, highlighted by the show heifer calf prospects.

Don't miss this tremendous sale of top bracket "Herd Builders." See you at the sale.

Respectfully, Robert C. Balog

# OUR COMMITMENT TO OUR CUSTOMERS

**We use every tool available to produce efficient, high carcass cattle that will improve your herd.**

WE RAISE EFFICIENT, PROFITABLE CATTLE WHETHER THEY ARE BIG OR LITTLE

## 1 Why we use Growsafe & RFI Data?

We have always tried to use every tool available to help our customers and our own program in selecting the best genetics available. As time moves on, we keep getting more and more technology to aid in our selection. The Feed efficiency knowledge is fast becoming one of the most critical forms of data that has come along in recent history. It will help us select bulls and females that eat less and convert more, thus putting real dollars in your pocket. In 2018, we put in our Grow Safe system where we have RFI tested almost 1400 bulls. (All 2 year olds in the sale have RFI data available in the catalog) We believe that this is a real tool that we need to implement into our cow herd. It is heritable and will not only help produce cows that are more efficient, but through RFI testing, we can reduce greenhouse emissions such as ethane by 30%.

## 2 We have done Ultrasound for over 35 years.

From Windy Ridge Ultrasound: Ultrasound has been used to evaluate beef carcass on live cattle since the late 1950's. I started doing carcass ultrasound testing commercially in 1994. Hirsches were some of the earliest supporters of carcass ultrasound and now many of their bloodlines excel in desirable carcass traits. Without the knowledge of individual carcass traits, breeding to achieve desired outcomes would be difficult. Desirable carcass traits are one of those factors that can add to the profitability for the feed lot and cow calf producers. Percent Lean Meat Yield (what percent of the carcass is lean muscle) is calculated using the Backfat (BF) and Ribeye Area (REA) where the BF reduces Yield about 7 or 8 times more than REA will increase Yield. Weight adj. REA of 10 square inches of REA there are for every 100 pounds of weight. (1000 # bull with a 10" REA would be a Weight Adj REA of 10 square inches of REA per 100#s of body weight) A bigger bull should have a bigger REA so the Weight Adj. REA is comparing apples to apples. It is a real pleasure working with Hirsche Purebreds as they are very progressive in their use of technology. Yours truly, Rod Wendorff [rod@cattleultrasound.ca](mailto:rod@cattleultrasound.ca) (403) 330-3000.

## 3 EPDs (Expected Progeny Difference)

EPDs- The prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. You cannot compare EPDs across other breeds. Each breed association calculates that breed's EPDs

**BW** - Birth weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**WW** - Weaning Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Milk** - Maternal Milk EPD is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**TM** - Total Maternal, Maternal weaning weight EPD measures a sire's ability to transmit milk production and growth rate through his daughters. It predicts the weaning weight of a sire's daughter's calves. It is equal to his milk EPD plus one half his weaning weight EPD.

**REA** - Ribeye area EPD is a predictor of the difference in square inches of ribeye area of a sire's progeny compared to the progeny of other sires.

**IMF** - Marbling, Intramuscular Fat EPD is a predictor of the difference in a sire's progeny for percent intramuscular fat in the ribeye muscle compared to other sires.

## 4 HERDTRAX

The Hirsche's have enrolled their entire cow herd (purebred and commercial) onto Herdtrax. Herdtrax is an online record management program that is based on the detailed collection of data on each individual animal at all key health and production points. The philosophy is "What's measured improves." The goal of the entire exercise is to acquire and share meaningful data on all of the animals produced and use this information to assist the commercial producer with making better decisions regarding what type of bulls work best in their program and to also provide the producer with valuable feedback on how their bulls are working for each commercial producer in the respective environments. Hirsches are unique in that they also have a substantial feeding operation and are able to provide a conception to carcass (c to c) network through the buyback of progeny from the bulls sold in their sale. These purchased cattle will be subsequently fed until harvest when individual live weights, gains, and carcass data is returned and when possible linked back to the dam and sire. Herdtrax Inc. is proud to have the opportunity to work with the Hirsche family and if you have any questions regarding their Herdtrax data sharing network contact myself directly.

Yours truly, Troy Drake email: [troy@herdtrax.com](mailto:troy@herdtrax.com) Phone 403 540-8934

# READING THE LOT DATA DERIVED FROM THE TOOLS

1

## Grow Safe Explained

This is the fourth year Hirsche Purebreds (GAH) are using GrowSafe to measure the feed efficiency of their young breeding stock.

GrowSafe technology measures the feed intake of individual animals and their weight gains. When an animal puts its head in a GrowSafe feed bunk, its RFID tag is read and the feed intake is calculated. When the animal goes to the water trough its weight is calculated.

Cattle are on test for approximately 2 months which gives an excellent representation of their efficiency. Through this process Residual Feed Intake (RFI) is calculated which is the difference between their actual and expected dry matter feed intake.

The lower the RFI value is the more efficient an animal is. For example, an RFI value of -2.1 means an animal is projected to consume 2.1 less pounds of dry matter per day than what is expected for its size and weight gain.

The goal of NHP is to select highly efficient breeding stock, stacked generationally, that will bring improvements to their breeding herd and increase value for their clients.

Calculations are all based on data acquired from the GrowSafe feed trials:

- **ADG** (Average Daily Gain) - animal's weight gain divided by days on trial.
- **Eff** (Feed Efficiency Ratio) combines an animal's efficiency and ability to gain weight, weighted 60% on RFI and 40% ADG.
- **F/G** (Feed to Gain index) - feed conversion is calculated by an animal's average dry matter intake divided by its ADG. For example, a 5.62 F/G value means an animal consumed on an average 5.62 pounds of dry matter for each 1 pound of gain.
- **RFI** (Residual Feed Intake) - the average pounds of feed consumed by an animal per day minus its expected feed intake. Negative is better

Negative is better

• **GAH%** (Hirsche Purebred Balanced Index) - (ADG Index + F/G Index + RFI Index) / 3

We have developed the **GAH%** which equally weights an animal's **growth, feed conversion, and efficiency**. An animal with an 100% NHP index would be average in its contemporary group. Animals with higher NHP indexes are likely going to have offspring that are more productive and efficient through growth and maintenance. All calculations are made from data received from GrowSafe, a third-party provider. All animals are sorted into contemporary groups according to breed, trial start date and weights, age, and gender.

Example of data shown on each sale Lot:

### GrowSafe Data

ADG	EFF Index	FEED to GAIN	RFI	GAH Index
2.71	92	8.36	2.2707	92

#### Feed Efficiency Test

ADG- Average Daily Gain during test

EFF- Efficiency Index

F/G- Feed to Gain (ex. 5.1 lbs eaten = 1 lb gain)

RFI- Residual feed intake

NHP Index - ADG/F/G/RFI=NHP Index

2

## Ultrasound Explained

### Ultrasound Data – What do the numbers mean?

(Rod Wendorff)

All Carcass measurements are taken between the 12th & 13th ribs which is the industry standard.

- Ribeye Area (REA) is the size of the loin muscle in square inches (in<sup>2</sup>).
- Percent Lean Meat Yield (%LMY) is what percent of the carcass is lean muscle.
- Backfat (BF) is the thickness of fat covering the loin muscle in mm.
- PFat (Percent Intermuscular Fat/Marbling) 9+ is Prime, 4 to 9 is AAA/Choice, 2 to 4 is AA/Select, < 2 is A/Standard
- The Ranking is (RFI Ranking of 1-185 Hereford bulls that went through the GrowSafe)

### Ultrasound Data on each lot:

LMY	BK Fat	IMF score	REA in <sup>2</sup>	REA/100#
66.38	2.38	AAA	12.04	1.0

#### Ultrasound Data

LMY- Lean Meat yield

BK Fat - Rib Fat

IMF score - Marbling

REA in<sup>2</sup> - Rib Eye Area square inches

REA/100 lbs - ex. 1 = 1 sq in of rib eye per 100 lbs

3

## EPDs Explained

All our Herefords are enrolled in the THE PROGRAM. (Total Herd Evaluation) is a complete herd reporting system to evaluate performance traits. Participants in the program provide performance reports (adjusted weights, indexes and ranks) and EPDs which are one run twice a year.

### EPDs and Performance Data on each lot:

EPDs	BW	WW	YW	MM	TM	REA	IMF
	3.0	50.3	81.2	22.6	47.8	0.35	0.08

#### EPDs Table

BW- Birth Weight

WW- Weaning Weight

YW- Yearling Weight

MM- Milk

TM- Total Maternal

(milk + growth combined)

REA- Rib Eye

IMF - Marbling

### Performance Data

BW	205	365	Sept WT
100	576	917	1270

#### Performance & Growth Data

BW- Birth Weight

205- Adjusted 205 Day Weight

365- Adjusted 365 Day Weight

September 2020 Weight

## BONANZA 2022 LINDSAY, ONTARIO

One of our favourite things about this breed is spending time with & supporting our Juniors.

In today's industry when you're looking for muscle and power, Eclipse has to be ranked near the top of the Hereford breed. Neon and Rambo were identified early in their life as something special and went on to be industry changers. Eclipse is following that same pattern. Shortly after his birth, we found him to be unique, emphasizing more muscle and power. We then watched him grow into one of the best calves we have raised and sold that fall, 1/2 interest for \$80,000. He then went on to be one of our best show bulls ever, winning many major shows including Supreme Champion at IPE and top 5 at Edmonton and Agribition Supreme Show. But most important, he has proven that show bulls can be breeding bulls also. His calves are our some of best ever. Muscle, power, style. This is our 2nd year of calving his daughters and they are unbelievable. We love them. Udder quality is # 1 with tons of milk.

Owned with Curtis Rasmussen and Dallas Farms  
 Maternal brother to service sire A. They are sons of our great 315Y cow. 170H was our feature calf last year and ended up selling 2/3 interest for \$145,000. Truly one of our best prospects ever. Produced excellent semen at 12 months & was one of our best breeders as a yearling. We're really excited to see his calves this spring. The bone, foot, muscle and power along with unsurpassed style is second to none. His calves are truly special with the style and power of his brother Eclipse, but a full frame bigger. Our top prospects are his sons and daughters.

I've ranked this guy as our best Eclipse son ever since birth. His dam is our great 171Z donor cow with embryos selling as lots 1-4. Maternal sister is also a donor cow 578G and has a heifer calf and bull calf. Another maternal brother is working at Wyoming Hereford Ranch, True Grit 47G. One more of her sons is being used here as well as at Parkview. My 2 most productive cows are this guy's mother and grandmother.

Every once in awhile things mesh just right and you get a great one that even out breeds himself. This is one of those. Everyone of his calves is outstanding. He will almost always improve the cow he is bred to. Little Fort Herefords bought a piece of this guy with Andersons and both report, their best calf crop ever. They're big, long and thick with tons of pigment and look at his marbling. Top 20% and is ranked #1 on RFI as well. We'll be excited to see how his offspring does on RFI.

This is a "No Name" that has all the right pieces and breeds that way. He looks like his sire Deluxe and yes, his grandmother is our great 253W cow. His mother was a super star that we were offered big money for her at Denver Stock Show & then lost her first 2 calves at birth. This guy was #4 and made up for all the mom's bad luck. She is one of our biggest cows with a perfect udder and more capacity than any cow we have. 119F has bred well. He probably has as good of carcass numbers as any we've raised. All 4 carcass traits in the top 30% of the breed and 3 in the top 18%. Birth to yearling spread is really good.

A true feature out of our top 132A donor cow. 21F is the best Rambo son we've raised to date. I love his power, hair and pigment. He is the example of a big bull that has great feed efficiency data out of 200 bulls. He was #1 and has an RFI EPD of 116, top 1% of the breed. Top 1% for REA and Carcass weight as well and top 8% for both yearling and weaning growth. A very sound bull with great carcass, growth, RFI, hair and pigment, from a great dam. His temperament is second to none. Nice to have walking bulls of this quality.

A Ruger son out of a top Uptown daughter, 309B. He was purchased in Calgary Bull sale 2017 by Kevin and Joanne Fraser as the high seller. A year later, we purchased 1/2 inter and have used him heavily every since. Will add as much pigment and hair as any. His females are following the pattern of his sire Ruger. His offspring just keep getting more popular. He will also add marbling.

Two flushmates that sold half interest to Parkview. We used both of them very successfully and then sold 47G to Wyoming Hereford Ranch. Pedigrees are as good as it gets. Dam is our great 171Z, same cow as 324G's mother. Sire is the great Hoffman "Bolt" that won Agribition and Rocking G owns. Both of these outstanding bulls will have a great influence today and in the future.

This herd sire is not one we talk about very often, but should really be studied and probably used way more in our breed. Look at his EPD numbers. Not only are his birth and growth numbers impressive, but he is a trait leader for Milk, and TM. Even more impressive is that he is also a trait leader for RFI at 106 and marbling at +.27. Chad Stephenson purchased 1/2 him as a calf and used semen so we could show and promote him. He did really well including Grand Champion Horned bull at Agribition in 2019. He was purchased that next spring by Wyoming Hereford Ranch and then sold to Monte Shockley in Texas. His influence is felt in several herds which will continue for years to come.

A proven super star with 10 traits in the trait leader status and still a real outcross, especially in the horned division. Muscle, extreme calving ease, maternal, and pigment are his strong suites. We've used him alot over the past year and love the results. One of the few bulls we've used to consistently add lots of pigment and lower birth weight, yet add growth. Really think his daughters will be something special.

It's so nice to see a show champion turn into a great breeding bull that helps improve our great breed. This guy is one of those. Denver Supreme Champion as well as a Champion breeder. Our top selling bull Blockbuster last year was his son as well as several other features. This year he hit a home run again with 125J lot 200 and many other features carry his genetics and service. He adds performance and muscle in a unique, stylish package.

**Owned by JK Fraser.** Another young Super Star we're really pleased to have been able to add to our semen inventory. We've used over 100 doses and wish we had more. I was able to see his dam and sister at Colyer's and decided right then, this is the Belle Air son we needed. Just take a look at his thickness and power, it's like few others and great pigment. We flushed our #1 young cow 132F to this guy. That should speak volumes.

Owned with JK Fraser. We really feel fortunate to have this excellent young sire. Sells as lot 216 plus service sire on many of our sale cows. Was used as our main heifer bull on our replacement heifers. Will play a major role in our program in the near future. His 2 year old Leader dam is sensational. Perfect uddered and weaned him at 925lbs with no creep or extra feed. As we've travelled around in Canada and the US, many of our favourites were "TH Frontier" sons and daughters. New outcross pedigree with pigment, freckles, and second to none EPDs and Big testicles and he produced semen at 12 months of age.

A few years ago, I went to Cooper's sale with the goal to find a bull out of Mark's best cow. Before even looking at the bull calves on offer, I went into the cows and found what I felt was the best cow. She wasn't the biggest cow, but she had a gorgeous udder, was deep bodied and had good hair and pigment. This was her son. He wasn't the best looking bull, but I knew he would be the best female producing prospect. We have not been disappointed. 2 years ago, we went decided to use him again to enhance our cowherd. Now he has another trait that is just as important. Look at his marbling EPD, a trait leader at +.22. You will not go wrong with his progeny.

These females are examples of 767T daughters.

Dam 116G is Eclipse daughter  
Calf 32J is 767 daughter

Parker Davis & 73J. She sells at The  
Genes of the Future in Red Deer.

### Horned . Owned with Carey Johnston, Richmond QC

This donor cow is 11 years old and we are taking her on the show road. She's still got a great udder, and is show shape without extra pampering. That's pretty impressive after being flushed all year while sucking her own natural calf. We are offering choice of her 2022 ET heifer and her natural calf at the Red Deer Genes of the Future sale. They rank 1 and 2 of all our heifer calves this year. That says alot about the power of this cow. She is proven in the Herd bull department as well with 3 top sale features 47G, 14G and 324G that are all proven herd sires. She produced 12 embryos last year and still bred back for an early calf. She was purchased in last year's Golden Mature Cow sale by Carey Johnston, who let us buy 1/2 interest back. Don't miss out on this opportunity.

Owned with Curtis Rasmussen There is a reason we flushed this cow so much. She excels in some of those traits that really matter. Calving ease top 6% of the breed, maternal calving ease top 1%, udder score top 2%. Teat score 3% and then look at the pigment and longevity. Her mother, 270Z is still here and produced a heifer calf I rank in the top 3 or 4. 28B's calf last year sold to Parkview as our top selling heifer calf and is still the top bred of this year. She will be shown this fall. Just look at the bulls we have flushed her to. They will add carcass and growth. She will add calving ease, maternal and pigment. Feet are also something her and her mother excel in. Mother is 11 and has show feet.

You all know the history of this cow. What an opportunity to once again buy embryos out of this ELITE female. Doesn't matter what 315Y is bred to, they are the best of the crop. These embryos are out of the very top bulls we are using in our program and 2 of them will only see a few calves in Canada next year. "Insight" and "Elijah" are carcass specialists and the calves from this mating will be extra popular. She never misses, just look at her history.

132F & 80K - taken at DRI while being flushed.

Owned with JBLC Holdings

Our donors that we flushed this year is the largest group and by far the best we've owned. 132F and her mother have to rank near the top of that pen. This is our power and performance cow of all the donors. I have never had a cow with this kind of power and a perfect udder. A+ ten. It will be perfect size and milk like no other. Every bull she's bred to, she adds power and tons of performance and look at the embryos in the sale. You will have to agree, they could be really cool. She's guaranteed to make them big and the sire will refine them. This is a beautiful female. She was our # one selling cow to Kym Jim and we were able to buy 1/2 back. If she sold today, she would sell for alot more. My half is not for sale at any price. Oh and by the way, she averages 12 embryos per flush.

132F & calf 69J from 2021. Senior Cow/Calf Champion at Alberta Hereford Showcase

# HEIFER CALVES

Because of our extensive ET program and big numbers, we've felt for the last few years that we could offer the top 10 or so heifer calves as sale features and show prospects. This year it is even a little more special because they are mostly out of our ET program and represent our very best cows. I know you will not only find some of the best quality females available, but out of the newest and best young sires available. Lastly you will be able to see the effects of our selecting heavily pigmented bulls. Most of these females have 100% pigment and a lot with big google eyes.

## **HORNED 100% eye pigmentation**

Here's another one of the cow/calf picks from last year's sale, Karsten Grabler chose 22J, so we kept the dam of 71K. 22J is a great bred heifer and was shown by Karsten at the Alberta Junior show this summer. 71K is being ranked today as our top prospect. She's just plumb good. Really thick with extra depth and power. Her sire is the Eclipse son out of 171Z, that was shown last fall. My favorite Eclipse son. Has the power and class of Eclipse, but in a lot bigger package and this heifer takes after him. She will be big enough, but really thick. Dam is out of a 315Y son, so this calf is double bred 315Y. Wow, that's why she's so thick.

**HORNED** Eye pigment 100% on one eye

Another 324G (our top171Z x Eclipse herd bull). I was sure he would prove to be a great breeder, but to have 2 of my best heifer calves is even more than I expected. 71K and 72K are 2 great ones. 72K has just a little more growth and style and is still ultra thick. I rank this one really high. She will have a chance to wear a show halter this fall. Her dam, 194F has a perfect udder and is out of a great cow family. We kept her both her heifer calf and yearling heifer last year. This is her 3rd good heifer in a row. Wait till she has a bull! Wow

**POLLED** This is why we do embryo transplant. Our top cow bred to our top bull and produce a top heifer calf. Probably too big for the show ring, but I guarantee she will be the best producing female here. If you want to raise a herd bull, 9K will fit the bill. She is feminine, but big, powerful, and really correct. Just take a look at her EPDs. We're preaching carcass, carcass and more carcass. For her, all in the top 30% of the breed. Milk, weaning, yearling, TM and PWG all in the top 20% or better. Her dam is our feature donor cow 253W with embryos selling Lots 5-13.

### **HORNED Eye Pigment 80% and 50%**

Headliner 499H daughter out of a great proven cow. Her calf last year 219J sold as a feature to Parkview and another son sold to Allen Ranches. She made the Platinum on Herd Trax cow list. 67K is well marked with good eye pigment and has a great hair coat. She is destined to be a great cow. Will be a great buy. Owned with Curtis Rasmussen

**219J: Maternal brother to 67K. Featured seller to Parkview Farms in 2021 sale.**

### **HORNED 100% eye pigmentation**

Blockbuster heifer that is one of my picks. She's moderate, but the thickest and deepest heifer in the sale. Her dam produced a feature and show heifer calf in last year's sale, (147J) that Parker Davis purchased. This calf is very similar and maybe even a little thicker. This will be one to have fun showing, then watch her produce. She is my kind. The dam was a feature "pick of the pair" in the sale and since the heifer was picked, I got to keep mama. She also produced a \$7000 bull to Jerry Oldland the year before. 3 features in a row.

### POLLED

Another great one with big red eyes and pedigree I could write a book on. Maternal sister to our great Reserve Calgary champion Eagle's Rock 599E. Cow came from Peter Martin and she also raised our good Herd bull, 344D. 45J has the same power as his mother, but has natural power of her sire as well. Trust me, this will be one of the buys sale day. Not much data, as Peter only has 3 cows and doesn't submit performance info, but you can believe me that milk is not a problem. PE 499H April 8 – May 22 June 1 – July 25 to 182J PC February

Owned with Border Clan (Tom & Rae Elliott)

**613H**

Tommy found this bull at the MJT sale and asked us to partner with him. We are really glad we did. He checks a lot of our boxes. For starters his dam is Mick's 16B donor cow so you know that the udder and maternal is under control. He has 2 big goggle eyes, extra length, structurally sound, and his EPDs are good across the board. However, what we are most excited about are his Carcass traits. They are all in the top 10% of the breed. Any female bred to this sire will be a great investment no matter what you do with the calves.

# BULL CALVES

This is truly one of the most diverse and best groups of bull calves ever offered at Hirsche Herefords. This is the first set of sons of our High selling Blockbuster bull, Denver Champion Dominant 308F, Reserve Champion Candy Bell 9036, our top selling RFI and carcass bull 499H and last year's high selling 2 year old, Avalanche 1H. All these are the best and newest genetics we could find. We also have our best Perfecto calves. This is our 2nd calf crop of his calves. Think you would travel far to find a better group. Newest genetics available for your herd.

**HOMO POLLED** Owned with JKF.

This guy is ultra cool in every aspect. We purchased him in a pregnant receipt at the 2021 Copper Creek Sale and he has turned into one of our greatest buys to date. He represents a complete outcross pedigree for us and probably most Canadians and is out of proven genetics. His dam is a top donor cow at Copper Creek and the sire is the Champion Colyer bull that they bought and imported to Canada. This guy's flushmate is still owned by Copper Creek and was named Stars of the Future all breed Bull Calf Champion at the Armstrong show. Our 11K checks all the boxes to be a herd sire and be one of our first to carry the "ND" brand. He is the right kind with class, power and well marked, and really excels at this stage of his life in EPD profile. He is already genetically enhanced so these numbers reflect accurate EPD data. He's top 35% of the breed in 14 of the 20 traits. His actual birth weight is 82lbs, and he has average EPDS in calving ease and birth weight. 4 of the most important traits in our program right now are carcass and he is in the top 35% and top 1% for 2 of the traits. 11K is the real deal and never got any grain until he was weaned first part of October. He is doing really well and keeps getting better. Last fall we were convinced that we needed to buy his receipt dam in the sale and were fortunate to get it done. He was Kevin Fraser's pick this spring of all our bull calves and he purchased 1/2 interest in this young sire. Terms will be announced sale day.

## POLLED

I love it when our best calf is out of one of our top cows and this is for sure the case with "Keepsake." His dam 243D sold in the sale last fall to Curtis Rasmussen and we took her back on shares. She is going to pay for herself with this guy. He's a good one. Her calf last year was in our top 3 heifers of the entire heifer calf crop and showed really well at Agribition and Olds. Her heifer the year before is also in the top 5. This guy is maybe our top Herd Bull prospect if you're looking for power and performance and is really thick and has 100% eye pigmentation on both eyes. One of the very first Blockbuster sons to sell.

### HORNED

Probably our best horned calf and yes, he is a Blockbuster our of our top 171Z Donor cow. This is a cool combination and a cool calf. He just keeps getting better. Dam is owned with Carey Johnson. There is a reason we keep featuring her each year. You will love this guy. But his 1/2 sister 5K is every bit as good and will be on the show road with this guy this fall. 171Z has already produced 2 good herd bulls, one working at WHR and the other one is jointly owned with Parkview. Her other son 324G, is my pick of all her sons. He was one of our main service sires in 2021 and has calves around the country. He still ranks #1 for RFI.

### HORNED Owned with Dahl Livestock.

Here is a great horned calf with a great pedigree and huge potential. He's been picked by many as our top. Hair, class, thickness and great pigment (100 % both eyes), plus he's an outcross in the horned world and yet great proven pedigree to back him. His dam is our top 3 year old. Was shown as a 2 year old with her feature sale bull calf that sold to Mexico. They were class winners at Bonanza and the bull calf was calf champion. 578G did something that few cows do. We flushed her last spring and 3 days later caught back, so this natural calf was born a week after her flush calf, selling as our top heifer calf prospect lot 30, 1K Note her mother is our great donor 171Z cow. Also dam of Heifer calf 1K

A herd bull right from day one. His dam is ranked as one of the best cows I've raised. Last year was named as Reserve Champion female at Bonanza and at Eastern Idaho State fair as well. Her heifer from last year 32J, will be shown this fall. 93K will be a little behind as he's at DRI where his dam was being flushed, so he has had zero grain and yet both him and his mother are in great shape. We will be retaining part of this great one. You will also have the opportunity to evaluate this pair on the show road.

If I were looking to buy a Candy Belle Herd bull, here he is. Dam is owned with Jackie Schmidt and showed very well last year as a yearling and now is making the kind of cow we thought she would. She's a flushmate to Blockbuster and maternal sister to our great 132F cow. We will rebuild our program around cows like 871H. She's big, deep and tons of muscle and power, yet is one of our top milking 2 year olds. 35K is long, well marked with the muscle power of his dam and granddam. Don't miss this guy. He will also help put Jackie through university.

Maternal brother to Lot 74's dam.

### #1 IN FEED EFFICIENCY

**HORNED** Owned by Stephen Wilson. Applelane Herefords

Another bull owned with Applelane that I like alot. He ranks in the very top and had a huge ADG of 4.23 and impressive F/G of 4.22. Ranked #2 over all in the RFI data. His pedigree ranks him up there as well. Dam is Stephen's Star cow, one of the first he bought from us and has turned into his #1 cow. Great udder and tons of power. Sire is his Uptown son also purchased as a feature in our sale. This is a good one. Big, thick and great feet and legs. He ranks #1 feed to gain. He eats 4.22 lbs. to gain 1 while we have bulls that eat 8 or 9 lbs to gain one. This is a number we need to pay a lot more attention to with feed costs at record rates. I would love his daughters in my cow herd.

### **HORNED Owned by Anderson Ranches**

Another top Anderson bull out of a great uddered Sensation daughter. His maternal grandfather is Rambo which is probably why he has a high REA EPD. His ultrasound showed an 11.9 sq in. Rib-eye with average marbling. Did well on RFI data as well with a great F/G of 5.43. I think this guy will just keep getting better. Take a look at his April 6 birth date.

98	735	1013	2.93	5.43	104	101	

### **HORNED Owned by Anderson Ranches**

Another Anderson bull that I rank high on Phenotype. Big, thick, power bull with a great disposition. Ranked in the top 10% for both REA & Marbling raw data. Huge Rib-eye of 13.1 per sq inch and still high end AA marbling. His dam is a great Kilo daughter that Darryl bought in our sale and this guy came in dam. Sire is our Overdrive 1C, a bull to add thickness and easy doingness. This guy will do both. He will add performance and do it efficiently. This is really why we gather all this data.

### TOP 5 IN FEED EFFICIENCY

We purchased some bull calves from Justin and Ashley Still last fall. This guy is one of them. He was purchased in dam and is out of our great 252M sire. You know that there is lots of maternal here. Dam is a young daughter out of our great producing 311B. She had several sale bulls. 10J is one of the power bulls in the offering. His raw ultrasound data also showed power with a huge 13.5 in. Rib-eye. #1 in the offering and he looks it. He also excelled in RFI data with an impressive 3.70 ADG and did it efficiently with a 5.11 F/G ratio indexing at 117. This is a good one to look at, and he backs it up on paper.

September weight with good growth and good hair. The only bull in the sale out of Hoffman's Denver Champion Deberard. Good outcross pedigree. 204J had good Ultrasound data with a 104 index for marbling and 100 for REA. Excels in EPDs with top 8% weaning weight, 15% yearling weight and TM at 20%.

**SIRE OF LOT 108**

Justin and Ashley Still have been buying Hereford cows, bred heifers and embryos from us for the past several years. They are very passionate, hard working young breeders that have such a love for farming, and raising good livestock. Last fall, we were fortunate to buy a few of their calves. The bull calves were fed and managed with ours and went through growsafe and had ultrasound data submitted. There are a few bulls and 2 bred heifers offered in this sale. They are among the best. We hope to continue to work with Justin and Ashley and their boys for years to come.

**HORNED** Owned with Jeff and Debbie Paul

I have a lot of time for this guy. One of the thickest bulls in the offering and excelled on test in the feed efficiency. ADG of 3.22 and an impressive 4.89 F/G, indexing 118 and Hirsche rank of 112. Dam is a perfect uddered cow with tons of milk and goes back to our flush cow 8C. His sire is a son of 767 and we know what I think of him as a cow producing herd sire. Lots of maternal power.

# SUMMER YEARLING BULLS

Young 2 year olds

This is our first group of late spring calving 2 year old bulls. When we were with NHP, over 1/2 of the hereford cows were moved to May/June calving to cut costs and utilize their pasture land. These cows were AI'd for one cycle so they still have the advantage of using the top bulls the industry had to offer. Birth weight and calving ease were higher priority when selecting herd sires. These represent the best of the group.

**POLLED Recommended for heifers.**

This is one of my favorites. 2 Big, red eyes. Red to the ground and really classy. A Perfecto son so outcross pedigree and tons of maternal and udder quality. Dam is also a great uddered cow and has tons of natural thickness. \*Note this guys birth date, May 22. Great EPDs with 3 of 4 carcass traits top 50% and 2 top 25% weaning and yearling also top 25%

One of Tommy and Rae's bulls out of a good uddered cow 395G. She is out of Uptown and Nugget (our 2009 Agribition Champion that sold semen around the world) Lot of growth and power in the pedigree and it translates in to a lot of performance. He arrived at our place after the grow safe rounds were completed, so we don't have RFI for him. He will be one of the good bulls sale day.
