POLLED. This is the kind of cow we've been trying to raise for 45 Years of breeding Herefords. Truly the best we've raised. She's big, really thick, extra deep and really classy and with NO extra feed. She is familiar with the show ring being a champion herself including Supreme over all breeds at IPE and qualifying for the Supreme show at Agribition. But even more impressive is her ability to produce even better than she is. All of her calves have been features 3 of them have been super stars. Marco is our top herd bull and now our 2 top calves for 2026 are both hers. Feature calf lot 110 and feature heifer calf lot 4.

OSHOTO: Sire of Lot 117. Grand Champion Agribition

HOMO POLLED. True outcross in the HOMO POLLED world. One will wear out a new truck trying to find one that connects as many dots as "Grad" He's truly a great. His sire was 2025 Agribition Champion and his dam, our great Jewel 16J was also named Champion many times including Supreme Champion at IPE. Grad is sure to follow in his parent's footsteps both in the show ring, but also as a power breeding bull. He's so proud and gets that from his mother and brother Marco. Great feet and markings and extra depth and length coming from his sire. Grad is big, long, deep with a hip that's second to none. Marked perfect with great eye pigment and good set of testicles. Sire is a trait leader in testicle size. Hard for us to find a great bull without Neon and Rambo back in the pedigree. Even Ohosto has both and Grad has Neon 4 times and Rambo twice.

Only a 3.4 birth with 90 yearling, 31 Milk, both teat and udder score 1.3 and RFI top 18%. 3 of the 4 carcass traits are on the right side. I really believe with this guys power, class, style and pedigree, he will be a bull talked about for years. When Jason Hoffman judged Denver 3 years ago, he said, "We need EPDs, carcass, performance and everything that goes along with it, but I still want them easy to look at." Grad is easy on the eyes. Easy to take a picture of.

Graduate to the next level with GH Grad 4P. Terms announced sale Day. Hirsche Herefords will be retaining an in-herd semen interest.

MARCO & 16J: Dam and brother of GRAD 4P

POWER GROUP OF COMING 2 YEAR OLD BULLS

Don't think I've ever had a coming 2 year old set like this one. Thanks to Chad Stephenson and our ET program this is by FAR THE BEST group we've ever offered. 8 of these young sires were used this summer. That tells you what we think of them. 4 sell with semen going with the bull. Chad let us come and pick the top 4 from his group. These are mostly out of our cow pedigrees and sires that you can't get up here. Really an Elite offering. The ET calves were too young to sell in last year's sale so here they are. Many of them are out of our best and newest genetics. You will be impressed.

HORNED. Owned with Stephenson Herefords

Well here they are!

The first of 2 Stanfields and he's a good one. We will have alot of calves next year from this exciting young sire. Also used by Brad Doenz this spring. He will sell with owner's use semen, but we're keeping some to use again. The sire, Churchill Stanfield was the top breeding bull last year in the US. Many high selling bulls were his sons, including Arizona and Legacy just to name a few. 510N is deep, thick and really easy doing. Dam is a top cow with another great one this year. She is Line 1 with Sensation mixed on the bottom side. Just look at this guys EPD profile, growth, milk and testicles all 5 traits top 2% of the breed. His carcass is good also with marbling top 38%, REA top 26% and carcass Wt top 25%. Only shown once so far and named Junior Champion.

CHURCHILL STANFIELD 3122L. Sire of Lots 118 & 119

CHURCHILL LADY 890F. Dam of STANFIELD. Granddam of Lots 118 & 119

HORNED. Owned with Stephenson Herefords

Here is the other Stanfield and he's every bit as good as his brother 510N. In the last 3 months, he's exploded. EPD profile is outstanding with 13 traits top 50 and 11 in the top 15%, milk and maternal at 1%, REA and Carcass Wt top 12% & top 8%. Just looking at this guy, one has to conclude his REA EPD is correct. He's really heavy muscled with extra growth. He's a big boy and will get bigger. Dam is also a top cow with Line 1 and Ribstone mixed in. We also used this guy AI and Natural. Will be fun to get his calves. He hits the show road in October and will make some friends. Like his brother, he will also sell with owner's use semen. We will be retaining some for ourselves.

59E Maternal Grand Sire of 520N.
2018 Agribition Champion Bull

STAR DANCE Sire of Lot 120 520N

HORNED. Owned with Stephenson Herefords

Here's the third of the 4 herdsires we got from Stephensons on shares this spring. This guy could well do as much for us as any. Used with his brother 536N to breed all our heifers. This guy and his brother are the only sons to sell out of Stardance in Canada that I know of. His dam is a daughter out of GH 59E that was Senior Champion at the Calgary Bull Sale and sold to Chad. He's made a huge mark in the US. Just look at this guy's EPDs 15 traits top 45% with marbling, FMI, milk and TM all 1%. Both growth #s are top 30%. So here's a great carcass bull with top 1% maternal and 30% growth and He's got lots of pigment besides. Doenz Ranches also invested in an In-Herd semen interest in this guy so they along with us will be keeping semen for next year on this exciting young sire. There is In-Herd semen selling with 520N.

Udder Susp	Teat Size	REA	IMF	Carc Wt
1.0	1.1	0.56	0.80	79.2

HORNED. Owned with Stephenson Herefords

This guy is probably the best heifer bull prospect we've ever offered for sale, and yes he also sells with In-Herd semen and we will be keeping some as well. His dam is another top daughter out of a Perfecto son that Chad purchased from us. His maternal sister sells as lot 79, 83N and maternal brother is our herd sire Momentum 19M. This other Stardance son and his EPDs are sensational in marbling, FMI, Milk and TM. All top 1%, Marbling at .80, that's just unheard of and yes along with .1 birth. His REA and carcass Wt. is still 35% for both. 536N is moderate in size, but really classy with lots of muscle and round. Not sure if one is looking for low birth, carcass and maternal you find one better. He was also used by Kim Davis naturally this spring.

POLLED. **Flushmate to Lot 123 60N**
Here are 2 outstanding herd bull prospects. 50N was used this summer. 60N was our spare. We love their outcross pedigree. Stimulus the sire, Dam is one of our top donor cows 171Z Lot 33, 52N & Lot 34, 126N are also flushmate bred heifers in the sale. 160L is another donor cow out of our 171Z cow family. This cow runs deep in our program. The udders, feet and power will be second to none. We used 50N, but 60N is maybe better. He's marked perfect with 2 red eyes and both bulls have great hair. 60N's EPDs are good well. These are the kind of bulls that will breed for a long time. Both have good feet and testicles.

1.4	1.4	0.68	0.15	94.3

POLLED. A March born bull

We used 154N hard this spring. He ran with 20 heifers from June 4-July 7. He's my kind of bull great hair, pigment, maternal and a great set of EPDs with carcass. 15 traits are on the right side, 10 in the top 20%. He might be the best over all EPD'd bull of the group. His dam is a true feature in this sale and the last 3 sales. Last year, our top selling heifer calves were all her daughters. In this sale, lots 26 & 25, 48N & 49N are both full flushmates to this guy.

28B: Dam of 154N

POLLED. **Owned by Dana Hirsche**
This guy should make friends sale day. Only a June baby and will weight with most of them. He's thick, and really classy. Tons of pigment as well. Dam is a commercial bred Eclipse daughter so you know that the udders will be great. She has another young calf we're keeping.

HORNED. Here's another ET calf and a guy to build a herd around. His dam 132F has as much power and passes it on as any. Then cross her with Stimulus and this is what we got. A power, well marked calf with carcass, maternal, and power. REA and Carcass Wt. 8% & 12%, teat and udder score. Top 10% & 20%. Good growth both yearling & weaning top 38%.

POLLED. One of the few direct Desperado son to sell. Desperado worked very well for us. Great EPDs with 13 traits on the plus side of the graph, great milk, maternal, growth, teat and udder and marbling. Dam is one of our all time top donor cows. This guy is a cow producer. He's big enough with a great birth EPD. Probably his best trait is his depth of body.

POLLED. Here is an outstanding bull. He's the biggest of the pen and EPDs agree. He's top 5% for both weaning and yearling, TM top 15% with milk to 32%. He also has one of the top marbling scores, ranking him top 10% with top 38% carcass Wt. Dam is a big, power cow with little teats and lots of pigment. Her calf this year sells as lot 164,16P.

FEATURE POWER BULL CALVES

It's easy to say best group ever, but we will prove it sale day. More diverse than ever with great outcross pedigrees on both the Horned and Polled side. Check out how many Homo Polled and Horned calves we have. Really impressive.

HOMO HORNED. A bull calf that is really unique and different and one of the top horned calves we've raised for years. If you believe in pedigrees, one would have to look really hard to find one like "Grit" He truly combines the "old with the new." His grandmother is a daughter of the Nixdorff YV 39D bull on the top side and on the bottom side, his grandmother is a SNS 31A daughter. Then the pedigree gets really interesting, Rambo back 2 times, a little line 1 with our 767 Cooper bull and the Churchill great breeding bull Desperado. Grit has some of our very best cow families mixed in as well. The great 59M, 154J, 171Z, Pearl and just about any one of the greats. Next if you study him, one has to conclude he has taken the very best of all these greats and combined them into a powerful, individual. Not sure if we have ever raised a calf with this kind of growth, performance and power. Well marked with great eye pigment and huge testicles. The class and style he possesses with this kind of growth is pretty amazing.
Terms announced sale day.

POLLED. Ranked this prospect at the top all year. He's long with tons of muscle and is proud like his dad Marco. Would love to see a set of steer calves from this guy. His dam is one of the very best producers every year. Last year, she had our second high selling bred heifer to Dawson Dallas and he sent her to us this fall to sell her calf in the sale. He sells as lot 142, 600P. This pair will be shown at Red Deer. 6P's maternal sister also sells in this sale as lot 38, 85N. He has any even set of numbers with every trait in the top 60% and 13 top 50%. All 4 carcass traits are better than breed average with Carcass Wt top 6%. For a bull with this kind of power and growth and still only a 3 birth is pretty special.

158J & her calf. Dam of 6P Lot 141 and 85N, and granddam of 8M Lot 142

Marco 7M: Sire of Lot 141 6P

POLLED. Owned by Dawson Dallas
Dawson bought this guy's dam as a feature bred heifer in last year's sale and asked if we could help market him. This is a good one. You will see him beside his dam 8M at the Hereford Showcase in Red Deer. She's got a great udder and doing a great job first time out the gate. Love the hair, pigment and depth of body this one possesses. Dam is a Desperado daughter, her son is out of a Desperado son 21M that we share with Randy Wagner. I would be happy to use this guy next spring. We love our Desperado daughters and this is why. Cow family here is second to none, just read the footnote on lot 141 6P, 8M's maternal brother and lot 38, 85N a maternal sister. This guy will breed on.

8M: Dam of 600P

85N: Maternal Sister

	Udder Susp	Teat Size	REA	IMF	Carc Wt	
	1.1	1.2	0.82	0.11	75.3	

HORNED. Picard is a very unique herdbull prospect. To be a herd bull you need to have a high quality mother as a starting point. Check out the quality of his dam. Few horned cows have udder quality like that. 58L's first calf was a heifer that sold at the Showcase for %15,000 to Rhett Rude. This super correct well pigmented son of the 2 time Agribition Champion and Showcase Grand Champion is typical of what the 1404 progeny are about.

What makes Picard even more desirable are his GE EPDs 3.8 Birth, REA .83 combined with an amazing 0.34 Fat (tops the breed)so you know his progeny will yield grade phenomenally. Add his great, easy going personality and you have a recipe for a herd bull.

Marco and his sons. Lot 145 & 146 at IPE All Champions.

SMOOTH POLLED This pair have been the highlight for my whole summer. A set of Marco twins that are sensational with a Dam I've never seen the likes of. We tried to get one of these guys off of her at birth, but then 66L and the twin 1P would have nothing to do with it, so I finally gave up and told her to raise them both.
AND not only did she raise them, but she weaned 2 of the biggest calves in the group. No nurse cow or supplement milk of any kind. Even now these 2 monsters will both suck for 20 minutes straight. Perfect size teats and milks as good as a Holstein. Showed them once where they were Champions, but really thought it was time to wean these guys. She's got 2 thousand pound calves nursing in Sept. Her show career is over with a perfect record of one out of one. We will be excited to see her calf next year. If you need extra milk with a great udder and teat size, here are the herd sire prospects for you.

APOLLO 1P: IPE Reserve Bull Calf Champion

The dam of Lot 145 & 146

Apollo 1P is smoothed polled and Zeus 2P is Homo Horned. 1P has a great EPD profile with 15 traits top 50%, 11 top 20% and 8 top 5% including both growth traits, calving ease, REA and Carcass Wt. 2P is outstanding as well and a little better in milk and maternal with 13 traits in the top 50%. Not much to separate these twins. Think we will be flushing mamma this spring.

ICEBOX 42L Son. HOMO POLLED.
A true powerhouse herd bull with a great balanced set of EPD'S. 4P is wide topped, stout and short marked. He will sire high growth calves that will excel in carcass TRAITS. As well as give you big volume females with excellent udder quality. His sire Ice Box 42L is top 1% of the breed for REA and 5% RFI. 4P's dam is a big powerful 2yr old. Deep bodied, with good pigment and an excellent udder. Top 5% WW and REA, Top 15% YW and FMI. Top 2% udder and Carcass WT. All the pieces here to make outstanding herd bull.

447M: Dam of 2P Lot 158

HOMO POLLED. A sure-fire heifer bull that will also fix udders and add marbling and fertility to his progeny. Perseus is stout, deep bodied, smooth fronted with a clean sheath and big testicles. An out cross pedigree with a great set of EPD's. Top 5% of the breed for SC, udder, teat, and marbling. Top 20% BW, Milk, and RFI. Really interesting set of traits that can benefit a breeding program.

POLLED. Owned with Curtis Rasmussen
Phoenix 7P is an extremely long bodied calf, smooth made with an explosive hip. He will add performance, power and maternal. His dam was purchased at Blair Athol in Sask. She is a larger framed 2yr old with an exceptional udder. Great teat placement and small size with an abundance of milk. Phoenix is top 10% for REA and Carcass weight. If you want a bull to add length and lbs. to a calf crop and still have power females that milk hard with great teat and udder quality, Phoenix will be what you need.

HORNED. This guy has the makings to be great. Dam sold to Curtis Rasmussen as a feature heifer calf. Her dam is the mother of feature bred heifer Lot 90, 14N and bull calf Lot 152, 42P. 67P's dam was one of our best show heifers, winning the jackpot all breed show as well as Hereford shows. This guy is getting hotter every day. He's a twin to a heifer that is as good as her mother was. We're just waiting to see if she's a free martin. 67P was raised by his mother. Make a note, he's almost 2 months younger.

2M: Dam of 67P

POLLED. HERD BULL ALERT

We're offering to buy 1/2 back of this guy. His dam is our top 28B daughter. She's in our flush program and we're selling some of her embryos, Lot 8, 418H. This is my kind of cow, big, classy, great uddered with good hair. 63P is going to be big and heavy muscled. His sire MJT 613H was one of our top bulls. He was our feature sire last year. We lost him and this will be his replacement. If I like him, you know he's got maternal and carcass. This guy is top 5% for both REA and Carcass Wt. Big growth and good milk. He has as much pigment as as any and will pass it on. Both sire and dam are very consistent in passing it onto their progeny.

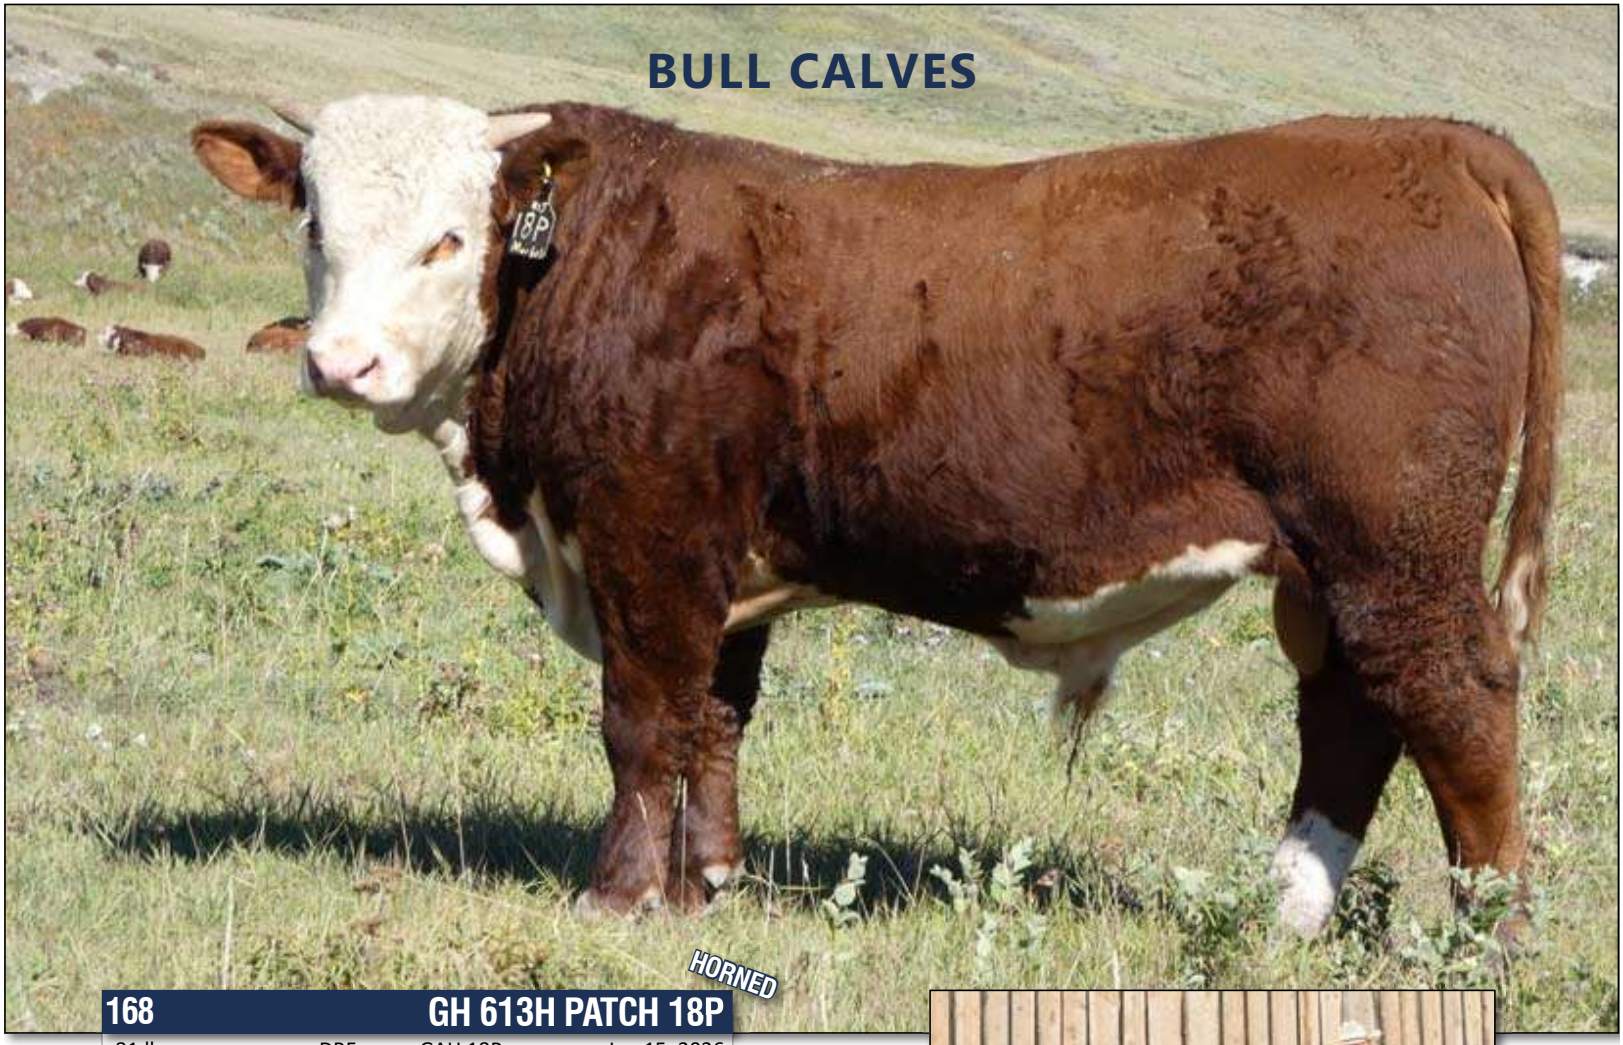

418H: Dam of 63P
Also selling flush & embryos Lot 8

POLLED. Owned by Dana Hirsche
This could well be our Copperstone Herd bull. He's big, deep, well marked with a great Dam behind him. She produce our top selling 2 year old bull last year to Allen Ranches in Colorado. We used her bull last year and he was still our heaviest bull. Lots of maternal and great hair as well. This guy should not be over looked. He's really honest and will make a happy customer.

HORNED.
Here's a March calf with huge potenial. He is truly one of the best when you consider he's 2 months younger than most of the bull Calves in the sale. He's bred Royally. Dam produced a sale feature last year, 92N that sold to Mexico. The grandmother 110G has produced several show cattle including her 73J daughter that sold as a feature in the Alberta Showcase sale to Apple Lane Farms. She was our top show female for 2 years. This guy should not be over looked. He could be a herd sire for anyone.

HORNED. Owned with Maple-Dale Farms
This guy has it all. Great pedigree, pigment, hair and phenotype to be great. He's really deep and thick. Dam is a maternal sister to our great 28B cow. She's got big, red eyes and a perfect udder. This guy would work great on black or R/W cows. He will take off white, add pigment, hair and maternal. Would love to see his calves. They will be the right kind. Nice set of EPDs as well with great marbling.

F1 BULL CALVES

Over the last couple of years, this portion of our bull sale has become very popular and our customers look forward to the offering. This year is no different. We've been working with my brother Dana the last couple of years. He's got a great group of Angus and Angus cross cows, many going back to our Dad's purebred Angus herd. We again bred these cows to a top quality Hereford bull and we are extremely pleased with the results. This cross produced some of the very best bull calves in the sale. They're big, powerful, with tons of maternal and milk behind them. If your looking for an outcross to add pounds to your calf crop, Here they are. You will not be disappointed with the results.

COPPERSTONE 11K. Sire of All F1 Calves

This is a proven Herd sire in both sons and daughters. He has maternal strength and adds performance and carcass to his calves. He is off the chart for REA at 1.10 and his carcass Wt is top 2%. His growth numbers are also at the top of the chart, with weaning at 3% and yearling top 15%. He will raise steers that excel in the feed lot and his daughters have good udders and lots of milk. They are the kind to keep as replacements.

GH 7057 COPPERSTONE ET 11K | C 4212 BLACKHAWK CCR 4R DONNA 23B

BWF 31K

Owned by Dana Hirsche

Here is a great F1 to start our offering. He's big, long, deep and has everything F-1 bulls excel in. His dam is the kind to raise a herd bull. Perfect udder with great feet and legs. One of the reasons to use an F-1 is temperament and this guy is a AAA in that department. His sire is a high dollar Hereford that is fast becoming famous on the strength of his females. 106P checks all the boxes

F1 BULL CALF

183 DH BIG JOHN 102P

88 lbs | 102P | Jan 4, 2026

GH 7057 COPPERSTONE ET 11K | C 4212 BLACKHAWK CCR 4R DONNA 23B

BWF 16K

Owned by Dana Hirsche

This guy could also start our F1 offering. 1/2 brother to Lot 182 and shows it. His dam is one of our very best. She's got a great udder and is our #1 producer. This is her 3rd calf in a row that's been a sale feature. She's the mother to the popular "John Boy" bull 2 years ago & last year's feature calf that went to Mexico. This is probably her best so far. Great dispostion in this guy as well.

184 DH BLACKSTONE 109P

92 lbs | 109P | Mar 3, 2026

GH 7057 COPPERSTONE ET 11K | C 4212 BLACKHAWK CCR 4R DONNA 23B

ANGUS 537

Owned by Dana Hirsche

Just look at the consistency of these calves. All out of our great Copperstone bull. Dam also produced a feature last year. Perfect udder with tons of power and performance. This guy probably has the least amount of white of the group.

185 DH RED PUNCH 115P

91 lbs | 115P | Mar 17, 2026

GH 7057 COPPERSTONE ET 11K | C 4212 BLACKHAWK CCR 4R DONNA 23B

ANGUS/HEREFORD CROSS 27K

Owned by Dana Hirsche

This guy is probably my favorite. Dam is our best F-l cow. This is her first calf that looks like a Hereford. This guy will give an extra Punch to his calves and still keep the red and white. He's got as much muscle as any with extra length. His mother has a great udder.

F1 BULL CALF

13D: Dam of 101P

186 TWIN HILLS LADDY BOY 101P

GH 7057 COPPERSTONE ET 11K | C 4212 BLACKHAWK CCR 4R DONNA 23B

ANGUS COW

Owned with Glen Hirsche

This is probably our biggest F-1 bull out of a purebred Angus cow. She's huge with tons of power and performance. He is also out of a purebred Hereford bull that is none papered. This guy will add lbs to your calves and help with disposition. He's really quiet and easy to work with.

LOT 187

187 DH ISABELLE'S PEDRO 107P

89 lbs | 107P | Feb 7, 2026

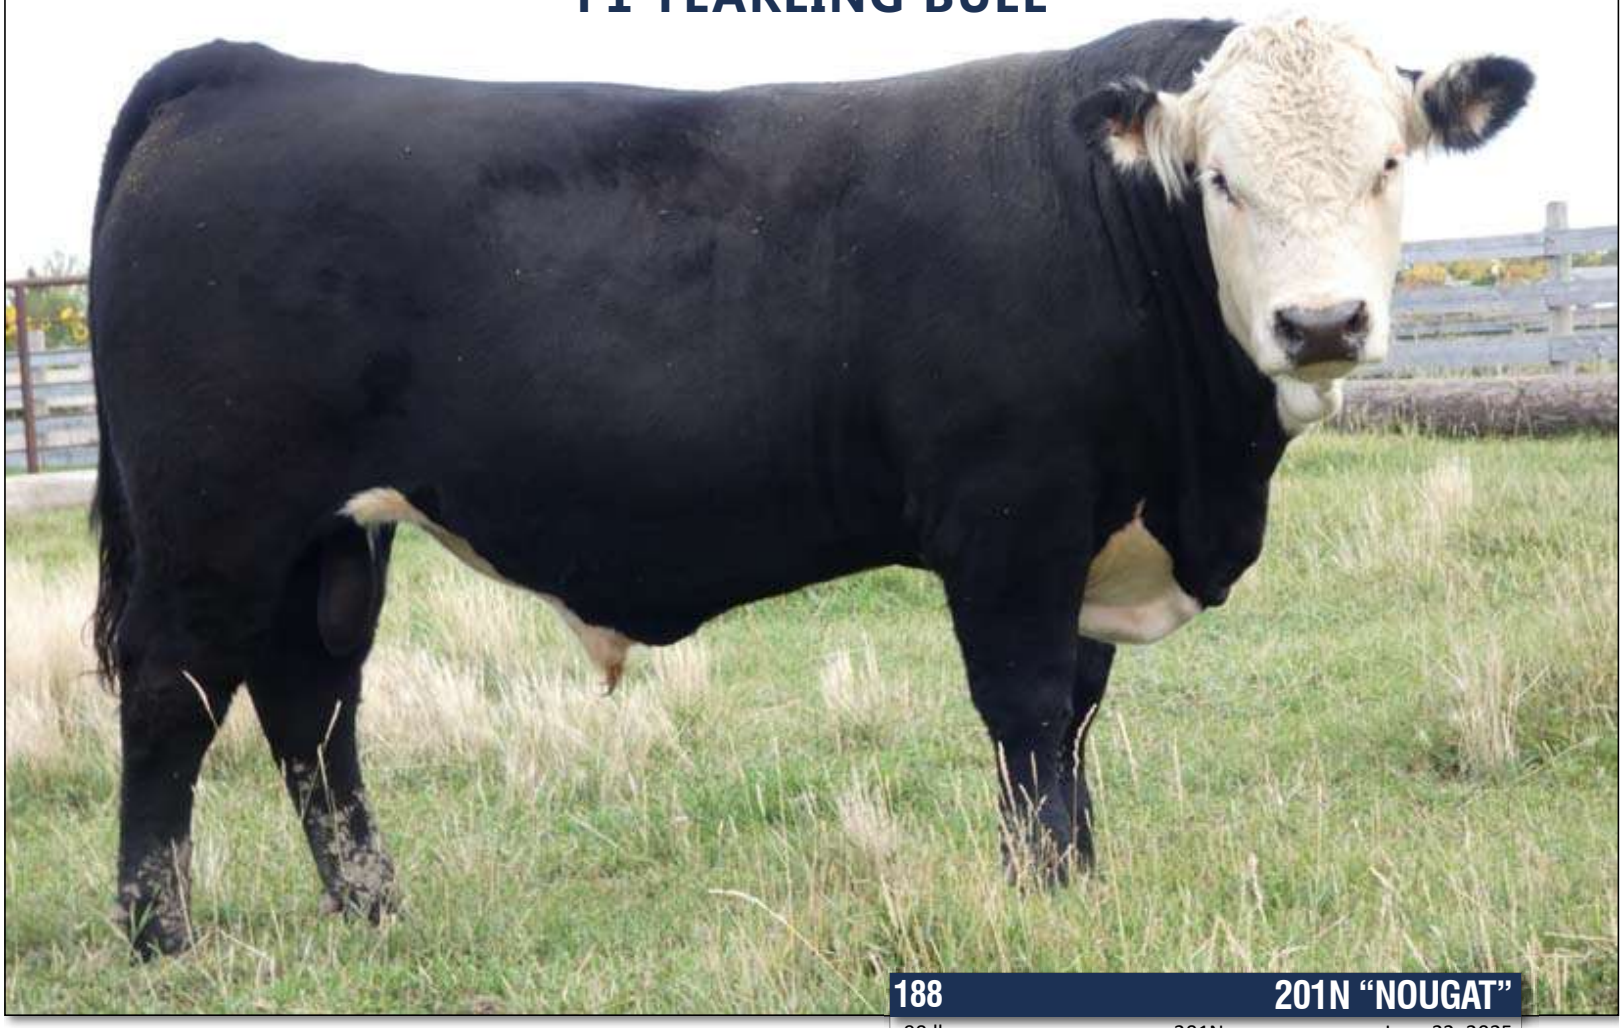

GH 7057 COPPERSTONE ET 11K | C 4212 BLACKHAWK CCR 4R DONNA 23B

BLACK COW ISABELLE

Owned by Dana Hirsche

Another really big F1 out of a straight black cow. Of all the F1 calves, this guy will add more milk and maternal than any. Dam is a huge milker with tiny teats. If you need more milk and fix udders, this is your guy.

F1 YEARLING BULL

188 — 201N "NOUGAT"

90 lbs | 201N | June 22, 2025

Owned by Dana Hirsche.
This is our only F1 2 year old and he's a great one. A little younger so was too young for sale last year, but wow how he's grown. Also AAA in the disposition department. He's got great feet and will be over a ton sale day.

F1 HEIFER CALF

LOT 189

ANGUS COW

Owned by Dana Hirsche
This is our classiest calf and out of a purebred Angus Dam. She's big, deep and great uddered. She also had 2 sale features in a row. This guy has very little white and could be used on heifers. He has been one of our most popular all summer.

Dam of 100P
